

Accuenergy Falkland Islands

Where is accuenergy located?

In order to serve energy markets worldwide, Accuenergy's global footprint now spans multiple countries. In addition to the Toronto, Canada headquarters, Accuenergy has offices located in the El Segundo (United States), Xi'an (China) and Pretoria (South Africa).

When did accuenergy start?

When Accuenergy was founded in 1998, dozens of meter manufacturers were flooding the market with devices that were bulky, complex, and expensive. Built on technology from the 1970s, most meters were simply too antiquated to be useful in modern building control applications.

Why did accuenergy start a second R&D centre?

With the growth of the business into energy management systems, a second R&D Centre was established in Toronto to quickly respond to customer requirements in North America. Accuenergy launches its first Data Acquisition Server to meet the growing needs of customers looking to fully integrate metering into building automation systems.

Why did accuenergy relocate its headquarters?

Accuenergy has relocated its headquarters to a new facility to better serve its growing business. Now with a total of 150,000 square feet of space to accommodate company expansion, our modernized headquarters fully supports our R&D, engineering, customer service, and shipping operations.

Why did accuenergy start in the 21st century?

In the early stages the founders of Accuenergy understood entering the 21st century technology was the catalyst that would push energy demand growth to be more sustainable and efficient. The world was entering the digital age that would connect both technology and people together in ways never possible.

Accuenergy has been a trusted global innovator for revenue grade energy measurement instruments since 1998. Advancing critical energy infrastructure efficiency and performance is part of our core vision to improve energy conservation and enable a better, sustainable future.

Expanding on the concept of a "truly islanded network", Mr Ross said that the Orkney Islands and Samsø, an island off the coast of Denmark, are used as examples of islands achieving peak renewable energy ratios, some sources even ...
