

With the help of the international community, the government of Afghanistan has attempted to resolve the problem of electricity distribution; however, 30% of the total population has access ...

The Arghandi 500 kV substation, being constructed in Arghandi, Kabul, Afghanistan, will integrate approximately 1000 MW into the national grid. This power, transmitted through 500 kV double circuit transmission lines from ...

Abstract: Battery Energy Storage Systems (BESS) can the integration of Distributed Energy Resources (DER) and create a more reliable power grid. This paper will investigate the use of ...

The authors in obtained an optimal charging/discharging schedule of battery storage system (BSS) using single-objective GA to minimise the line loss of the distribution network. Their aim was to utilise BSS for ...

The work scope of the project mainly comprises design, construct, expand, and upgrade of High Voltage (HV) transmission, Medium Voltage (MV) distributio, Reactive Power Compensation (RPC) Systems, ...
