

How much does solar power cost in Algeria?

Algeria's Hamdi Eurl won two 80 MW plants and domestic PV panel maker Zergoun, alongside Ozgun, secured 80 MW in Guerara. The 19 projects represent an investment of EUR1.8 billion (\$1.96 billion) and the solar power prices proposed by the bidders ranged from EUR0.54/W to EUR0.81/W, with an average price of EUR0.625/W.

How many solar projects are being built in Algeria?

Representatives of Algerian state-owned utility Sonelgaz have signed contracts with local and foreign companies for the construction of 20 solar projects from two tenders. A total of 19 contracts have been signed by representatives of Algerian state-owned utility Sonelgaz for the construction of 20 solar projects with a cumulative capacity of 3 GW.

Where are solar panels made in Algeria?

Alongside Zergoun, the manufacturer Laguna Solaire has 200 MW of annual capacity for solar panel production in Algeria. The production plant of Algerian telecommunications and renewable energy company Milltech has a facility in Mila, in the east of the country, with a production capacity of 100 MW for M3-based modules.

Manufacturing hub

Who won a solar PV tender in Algeria?

ALGIERS, March 25, 2024 - The government of Algeria has unveiled the winners of two solar PV tenders, the first launched in 2021 and the second held last year, totalling 3 GW, PV Magazine reported on Monday. Contracts were awarded by Algerian gas and electricity utility Sonelgaz.

Will Algeria become a hub for solar glass production?

Offering its companies a low electricity price of about DZD 4.68 (\$0.03)/kWh, Algeria envisions becoming a hub for solar glass production, both for its domestic market and for US manufacturers, to replace Asian markets affected by an import ban on their photovoltaic equipment.

How much solar power does Algeria have in 2022?

As of 2022, solar represented only about 1.7% of Algeria's installed capacity with 460 MW and less than 1% of its power generation with around 690 GWh. Algeria's 2022 Program for the Development of Renewable Energy targets 22 GW of renewable capacity by 2030, divided between 62% of solar PV and 23% of wind.

Solar panels offer a smart energy solution for home and business owners and allow them to buy electricity at a set price per unit. This means homes and commercial properties of consumers will never be exposed to increased energy prices again, which will financial forecasting a lot easier.
