

Backup generator for homes Saint Pierre and Miquelon

A whole-house generator, or standby generator, functions by providing automatic backup power to an entire home during power outages. It's integrated into your home's electrical system and usually runs on natural gas or propane. When the generator detects a power disruption, it activates automatically.

Cummins manufactures high-quality standby generators suitable for homes and small businesses and provide dependable backup power across a range of applications. Use our generator size calculator to plan for your specific needs and prevent inadequate power during emergencies.
