How will the Bahamas reform its energy sector?

The Government of the Bahamas has discussed plans to reform its energy sector through a partial-privatization of BEC and by introducing regulation-by-contract principles to meet the capacity for future growth, implementing more economically viable renewable energy sources, and modernizing the energy sector.

Who is responsible for the energy sector in the Bahamas?

In the Bahamas, the Ministry of the Environment (MOTE) is the responsible agency for the energy sector. It is supported by the Bahamas Environment, Science & Technology Commission (BEST), which assesses the environmental impact of energy and electricity sector projects.

Who owns electricity in the Bahamas?

Majority-owned by Emera Inc. Based on average global generation costs for renewable technologies, electricity rates in the Bahamas offer an opportunity for renewable energy to diversify the fuel portfolio and reduce rate volatility.

Will the Bahamas have a solar water heating system?

In the next decade, the Bahamas aims to have solar water heating systems on 20% to 30% of all households, which has the potential of adding 200 GWh of heat for water per year. According to preliminary assessments, wind and solar resources offer the greatest potential for renewable energy development in the Bahamas.

What is the Bahamas national energy policy?

BESS AWARDED 'BEST MICROGRID PROJECT' AT THE CREF 2022 INDUSTRY AWARDS! The latest release of The Bahamas National Energy Policy documents the country's plans to implement renewable energy generation. This will introduce net-metering, which is the recording of energy flows in both directions. As the Bahamas has close to six daily peak sun hours.

What is the energy efficiency initiative in the Bahamas?

With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership with the Government of the Bahamas to reduce energy-related costs.

This document presents The Bahamas' Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in The Bahamas. The ERC also includes energy efficiency, technical assistance, workforce, training and capacity building information, subject to the availability of data.

As a dedicated leader, Minister Coleby-Davis is committed to advancing sustainable energy policies and

modernizing transportation infrastructure across the Bahamas. Explore her initiatives focused on renewable energy, regulatory oversight, and environmental stewardship, all aimed at fostering a greener, more connected future for the nation.

On the matter of spinning reserve, it is of primary importance to understand that in the event of a contingency such as the sudden, unexpected loss of a generator, the energy storage system (ESS) will respond within milliseconds to discharge 25 MW into the power grid for total duration of at least 30 minutes.

Energy Snapshot Bahamas This profile provides a snapshot of the energy landscape of the Commonwealth of the Bahamas--a country consisting of more than 700 islands, cays, and islets-- of which only 28 are populated. Located north of Cuba, with the Turks and Caicos Islands to the southeast, the Bahamas has an average electricity cost of \$0.32 per

The Ministry of Energy and Transport is committed to driving meaningful reform in The Bahamas' energy and transportation sectors. We aim to modernise outdated systems of energy generation, distribution, and transmission, while developing a safe, efficient, and sustainable transport network across the Islands.
