

Best Energy Solutions Philippines

How is Best Energy transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

How many Best Energy facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.

What is Best Energy Philippines?

Best Energy Philippines will offer energy management technologies and services on a 'shared savings' basis to their clients. That means no capital outlay for the client. Instead, both sides enjoy a split of the energy savings achieved during the project. Be prepared for a brighter future...

How much energy does the Philippines use a year?

The Philippines has massive scope when it comes to energy savings, with about 22.8 billion kWh of energy used every year by businesses. In our experience, a huge portion of that is being wasted right now - putting a strain on energy production methods that are still over 60% reliant on fossil fuels.

ECM is a collection of specialized services operated by ECM Holding Group, Inc.. Building Envelope Solutions was the founding skillset back in 2009. Whether through start-up or via purchase through our Pioneer Energy Capital investment group, ECM delivers comprehensive solutions for our ESCO and Corporate Clients.
