

Bolt energy solutions Ethiopia

Why should I choose Bolt Energy?

When you choose Bolt Energy, you will be helping fund Carbon Offset Projects that reduce emissions equivalent to your usage. A carbon offset is a voluntary reduction in greenhouse gas emissions that can be used to balance emissions produced elsewhere. Bolt Energy offers a variety of energy plans for your home that suit any budget and lifestyle.

Which sector consumes the most energy in Ethiopia?

All in all, energy consumption in Ethiopia continues to be dominated by the residential sector which accounts for 95% in 1990 and 88% in 2018. During the same period, the shares of industry and transport sectors grew, respectively, from 1.3 to 3.7%, and from 1.8 to 5.5%.

Can hydropower and bioenergy crops compete for agricultural resources in Ethiopia?

On the other hand, however, hydropower and bioenergy crops may compete for agricultural resources such as water, cropland, and pastureland. Ethiopia has an estimated 23.3 and 0.7 million ha of land suitable for growing *Jatropha curcas* (for biodiesel) and sugarcane (for bioethanol), respectively.
