

This paper discusses key findings of the Financial System Stability Assessment on Bosnia and Herzegovina (BiH). The financial system in BiH is still dealing with the aftershocks of the global financial crisis as well as deep-seated vulnerabilities. A high system-wide nonperforming loan ratio reflects the impact of the crisis, low growth since then, and a history ...

On December 16, 2021, Goldwind successfully signed a contract for the Iovik 84MW wind power project in Bosnia and Herzegovina, which is currently the largest wind farm in the country. After the completion of the project, Goldwind will achieve the wind power installation covering 13 countries in Europe.. The Iovik project is located in West Bosnia, about 90 km from the ...

Bosnia and Herzegovina's power mix is mainly comprised of hydropower plants and large thermal coal-fired plants. It remains a significant net exporter of electricity to neighbouring countries, ... The country's Independent System Operator anticipates that demand will decline by over 6% from 12,330 GWh in 2018 to approximately 11,500 GWh in ...

In the short term, the system provided the basis for immediate peace and power sharing but, in the long term, has not resulted in an inclusive, equitable, and genuinely democratic governing system. What is at stake? Tomorrow, voters in BiH's two entities will choose a total of three members of the Presidency, 14 parliaments, and 136 ministries.

Bosnia and Herzegovina, Footnote 1 North Macedonia Footnote 2 and Kosovo each have internationally brokered power-sharing systems with consociational elements that were put in place following their violent exits from Yugoslavia. These power-sharing systems have been studied extensively in the academic literature (Bieber 2005, 2006; Bieber and Keil 2009; Keil ...

Considering that the issues of relevance for the transmission and international trade of electric power are regulated by the Law on Transmission of Electric Power, Regulator and System Operator of Bosnia and Herzegovina ("Official Gazette of Bosnia and Herzegovina", nos. 07/02 and 13/03), the Law Establishing an Independent System Operator ...

The first grid-connected solar power system in Bosnia and Herzegovina was put into operation on 19/03/2012. The system can be housed on the roof of a gym in Kalesija, just outside of Tuzla. The system model is

presented in Fig. 6, while the real situation is presented in Fig. 7. The photovoltaic system is directly linked to the

Thus, in 1954, the electric power system of Bosnia and Herzegovina had begun to function successfully. In recent 60 years, since the establishment of "Elektroprenos", the capacities of the electricity transmission system have been developing dynamically. Organization of the electricity transmission system in Bosnia and Herzegovina had been ...

The Concept of Ancillary Services for the balancing of the power system of Bosnia and Herzegovina was defined by the SERC decision number 04-02-1-308-19/13 of 26 March 2014. The document is a milestone for the revision and improvement of the existing regulatory framework for the provision of ancillary services for BIH power system balancing and ...

By: Anja Vujakovic (Creative Director) Though calls for reform are nothing new, concerns for the future of Bosnia and Herzegovina's fate are compounded by crippling corruption, high emigrations rates, growing ethnic divisions and a staggering unemployment rate of 40 percent. In order to understand the current developments in the country's politics, it is ...
