

How important is Brazil's energy transition policy?

And the energy transition policy framework that we are building and implementing is also a critical aspect of Brazil's commitment in terms of decarbonizing and reducing emissions. And that is also something that we really hope to deliver as a lead by example when COP30 comes.

Will Brazil throw away the meaning of the energy transition?

Brazil could receive an estimated BRL 2 trillion in investments towards the green economy over ten years. “We are not going to throw away the meaning of the energy transition. This country has already thrown away too many opportunities. We cannot throw away opportunities. We need to bear in mind that we have everything.

What is the role of oil in Brazil's energy transition?

So, everybody is really trying to understand the role of oil in Brazil's energy transition. First of all, Brazil has committed investment in additional production of oil in the coming years. So, the production of Brazil is expected to grow. Oil production is expected to grow until the beginning of next decade.

What is Brazil's energy mix?

Brazil's energy mix is diverse; hydropower, fossil fuels, biofuels, wind energy, and solar power all make significant contributions (Table 1). Brazil's total energy production increased by an average annual growth rate of 1.5% from 2011 to 2021.

What is the share of oil in primary energy in Brazil?

The share of oil in total primary energy over the past 30 years has been broadly stable at around 35%. However, oil's share declines in all scenarios, reaching between 6% and 23% by 2050. Renewables (inc. biofuels) are Brazil's largest source of primary energy by 2050.

Does Brazil need more energy & climate solutions?

Solutions to energy and climate needs will depend on both domestic and international action. Brazil is keenly aware of the imperative of moving faster. It has suffered in 2024 from devastating floods in the state of Rio Grande do Sul and fires in the Pantanal region.

So, how is the energy transition unfolding in Brazil? And how can the country balance environmental protection and energy security? This week host Bill Loveless talks with Thiago Barral about how Brazil plans to build up ...

Establishing a Climate-Forward Clean Energy Industrial Partnership. Brazil and the United States share the goal of creating more competitive, clean, fair, and resilient economies by promoting the clean energy transition in a way that fosters economic growth and the generation of high-quality jobs, while reducing

emissions and keeping our 1.5°C goals within reach, ...

The Latin America Energy Outlook, the International Energy Agency's first in-depth and comprehensive assessment of Latin America and the Caribbean, builds on decades of collaboration with partners' support of the region's energy goals, the report explores the opportunities and challenges that lie ahead.
