Trinasolar has joined forces with Kiwi Solar and Trilect to launch Waikato's first-ever agrivoltaics project, marking its third foray into dual use agricultural and solar farming in New Zealand.

The project is BrightNight's first hybrid renewable energy project in Australia. It consists of a 360MW solar PV power plant and a 300MW co-located battery energy storage system (BESS), accounting for more than 1% of the state's total electricity consumption. The company plans to begin construction on the project in 2025.

The Australian Government's Indian Ocean Territories (IOT) Power Service is changing the way renewable energy is regulated on Christmas Island (CI) and the Cocos (Keeling) Islands (CKI), to generate greater local interest in, and uptake of, solar systems.
