

Does Ford's threat to Canada affect US electricity imports from Canada?

Given that Ontario is not a major producer of crude oil, Ford's threat appeared to specifically apply to electricity the United States imports from Canada. "Canadians get hurt, but I can assure you one thing: The Americans are going to feel the pain as well, and isn't that unfortunate," Ford said.

Will Canada cut off energy going down to Michigan?

"We will go to the extent of cutting off their energy going down to Michigan, going down to New York State and over to Wisconsin," Premier Doug Ford of Ontario, Canada's largest province, threatened on Wednesday evening.

Did you know Canada is the largest energy supplier to the US?

Did you know that Canada is the largest supplier of energy to the U.S.? In 2021, Canada supplied the U.S. with 61% of its crude oil imports.

Why does Canada import US electricity?

For instance, Canada imports US electricity when hydropower generation is low, such as during droughts. "The trade is important to grid balancing - constantly matching electricity consumption to electricity production -- and helping to shore up electricity supply," the EIA said in a recent report.
