

Caterpillar solar Mongolia

Does Mongolia have a 10 MW solar farm?

Mongolia has connected a 10 MW solar farm to the grid, as part of a plan to deploy 40.5 MW of solar and wind capacity in the nation's western regions. The Asian Development Bank (ADB) and the government of Mongolia have inaugurated a 10 MW solar power plant in Mongolia's Govi-Altai province.

How can caterpillar improve its productivity in Mongolia?

We know very well how large the Caterpillar fleet is in Mongolia and the number and frequency of component rebuilds, which allows us to plan and improve our productivity. To do this, first of all, we have to expand our production space.

Where will caterpillar market the new microgrid solution?

Caterpillar expects to first market the new microgrid solution in the Asia Pacific, Africa, and Latin America regions, with the integrated PV solution, including Cat-branded solar panels, available for customers in that region in the second half of 2015.

What is the caterpillar microgrid Alliance?

This new alliance supports Caterpillar's belief that sustainable progress is made possible by developing solutions to help improve the quality of life, while also minimizing economic, social and environmental costs. For more information, visit cat.com/microgrid.

Is Khishig Arvin a Caterpillar brand?

Since 1997, "Khishig Arvin Industrial" has been a loyal customer of Caterpillar. We have heard that majority of 400 technical tools are of Caterpillar brand, are they? Yes. "Khishig Arvin Mining" LLC is operating at Tavan Tolgoi, a major global mine.

Why should you choose Wagner Asia vs caterpillar?

On the other hand, "Wagner Asia" has been proven to be the support of national mining companies as a rival in the world. In 2010, our company successfully set up a Caterpillar official and international certified petrochemical laboratory, and one year later, our first Aggregate repair center was successfully set up and commissioned.
