

Is solar energy a viable resource for the Dominican Republic?

High solar potential, along with integrating efficiencies and economies of scale, can make solar energy a viable resource for the Dominican Republic. Similarly, wind energy has strong potential, particularly in the southwest.

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

Why did the Dominican Republic start a solar park in 2022?

On 2022, DOMINION completed the commissioning of El Soco photovoltaic solar park in the municipality of Consuelo, Dominican Republic. The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy.
