

Diy solar panels to generate electricity and store energy

Are DIY solar panels a good option?

DIY solar panels are a great option if you are looking to get off-grid, or just subsidise some of your home's energy to a cheaper, cleaner method. Once you have figured out what size solar panel kit you need, they are relatively easy to install and little effort to maintain, as well as having plenty of cost-saving benefits.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solar is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renogy, Select Solar and Sunstore Solar are also well worth a browse.

How much does a DIY solar system cost?

If you're just dipping a toe into solar via the DIY route, start with one off-grid panel in a DIY solar kit that includes all the necessary cables, accessories and instructions, such as Renogy's 200W 12V General Off-Grid Solar Kit (currently just £230).

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

Can you build your own solar array?

Build-your-own from scratch solar array requires advanced technical knowledge and expertise that you may not have. DIY solar home kits are usually designed to work off-grid for small projects. Today, solar kits that allow you to directly tie into the public utility grid are becoming available, and may allow you to power your entire home.

How do solar energy systems work?

You have three choices for solar energy systems to power your homes and property: Grid-tied -- Your solar array is directly connected to the public electric utility which you pull from when energy demand is higher than your system output. Any excess is sent to the grid. In most places, the electric company credits your bill.
