

The company's experts achieve that through cell and battery consulting, material tests and development, custom cell design and manufacturing of customized batteries. EAS is renowned by its customers in: Offering an advanced cell portfolio, made in Germany; Offering modular battery solutions for various market segments

Since its foundation in 1996, the brand EAS has kept the pioneering spirit of the company in the development and production of large format cylindrical Lithium-ion cells using a unique, compact and novel electrode production technology to guarantee the highest quality standards at the lowest environmental impact.

Since its foundation in 1996, the brand EAS has kept the pioneering spirit of the company in the development and production of large format cylindrical Lithium-ion cells using a unique, compact and novel electrode production technology to ...

EAS Batteries GmbH is a manufacturer of large format cylindrical Lithium-Ion cells and battery systems, which are used in particular in the aerospace, aviation, marine and automotive sectors. Thanks to the flexibility of the production line, EAS can adapt its products to special customer

EAS Batteries GmbH excels in innovating high-performance cylindrical Lithium-ion cells and batteries for demanding applications across space, submarine, marine, and automotive sectors. Anchored in Germany, EAS employs patented production techniques to create Lithium iron phosphate (LFP) cells renowned for their safety and high power capabilities.

EAS, the German company acquired by Britishvolt, announced some progress from its own cooperations. EAS has supported BMW's Battery Cell Competence Centre in developing its first cylindrical cells and is also working with OneD Battery Sciences on ...
