Tajikistan has significant potential for solar energy due to its high solar irradiation levels and land availability. According to a study by the International Renewable Energy Agency (IRENA), Tajikistan has the potential to generate up to 220,000 GWh () of electricity from solar power, which is more than ten times its current electricity consumption. This...

EDAMA Association is a Jordanian NGO established in 2009 in response to Jordan's energy, environment, and water security needs. As a Business Association, EDAMA cultivates an environment where innovative solutions for energy and water independence and environmental conservation emerge. ... o Modern Arabia for Solar Energy PSC o Musleh Law ...

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

Anwar Elhalah, General Manager, EDAMA stated; &quot;EDAMA has had the pleasure of being part of the preparation and launch of the Operation & Maintenance and EPC Best Practice Guidelines. We believe the guidelines will help the solar energy industry grow. EDAMA appreciates the cooperation and dedication of all partners and stakeholders who ...
