How does EDP work in El Salvador?

By shifting a significant amount of power supply to natural gas,EDP reduces El Salvador's reliance on diesel and heavy fuel oil-fired power generation,offsetting 600,000 tons of carbon dioxide emissions per year,and provides grid support to facilitate more renewable energy penetration,further diversifying the country's energy mix.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

How much money is invested in El Salvador?

In total,the project represents an approximately \$1 billioninvestment in El Salvador. At least \$10 million will be invested in economic and social works during the term of the power purchase agreements,strengthening local communities with a more than \$500,000 investment per year.

When did El Salvador's EDP power plant start operating?

Despite the enormous challenges,including supply-chain disruptions,travel restrictions,airport closures,global financial volatility,and Salvadoran COVID-19 mitigation measures and regulations,the power plant began commercial operation in October 2022. EDP is a transformative investment in El Salvador's clean energy future.

What are the upcoming projects in El Salvador?

The upcoming projects in El Salvador include the construction of a Biogas Power Generation Plant on the Acelhuate River in San Salvador, the commissioning of a photovoltaic plant at the 15 de Septiembre Hydroelectric Plant, and the establishment of a wind park in Metapán, Santa Ana.

Towards sustainable energy, El Salvador is set to embrace a future dominated by renewable projects, contributing to the region's ambitious target of 95% renewable energy by 2024. According to the Latin American Energy Organization (Olade), this surge in green energy initiatives will revolutionize the energy landscape of the country.

To meet the growing demand for electricity in one of the most densely populated areas of the country, AES CAESS has invested more than US \$1 million in a power grid interconnection project. This initiative aims to ensure the security and continuity of energy supply to more than seven thousand customers in San Salvador.
