

Electricity solar Bermuda

What is our vision for Bermuda energy?

Our vision is an efficient Bermuda powered by affordable renewable energy. Our mission is to help every home and business in Bermuda reduce their energy bills and greenhouse gas emissions through the use of energy efficient and solar energy technologies.

How can solar panels be used in Bermuda?

Deploy solar panels in discrete locations to meet Bermuda Government and satisfy listed building planning regulations. Optimize available ground space and create economies of scale while effectively addressing aesthetic considerations. Construct a dedicated facility designed for solar installation that doubles as a shade provider or carport.

What is a Bermuda solar pump?

Bermuda Solar Pumps are pumps powered by solar energy. With no running costs, you can enjoy the view with peace of mind.

How much electricity does Bermuda use?

Large commercial organizations use about 40% of electricity produced. The standard voltage in Bermuda is 120 V and the standard frequency is 60 Hz AC. Flat, two-pronged plugs (Type A) are in use. All US and Canadian appliances work on the island, without voltage converters or adapters.

Who is Bermuda Engineering Company Limited?

Bermuda Engineering Company Limited was founded in 1935 by Gordon Hamilton Burland, a Bermudian renewable energy pioneer and engineer. Back then, he built the first clean energy microgrid in Bermuda and demonstrated bold energy leadership for his time. In 2010 the company was reinvigorated and has been operating as BE Solar since.

What is the electrical current in Bermuda?

The electrical current in Bermuda is 110 V, 60 Hz AC. Flat, two-pronged plugs are in use. All US and Canadian appliances will work on the island, without voltage converters or adapters. European visitors will need to bring adapters for their rounded plugs.
