

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

How has Malta changed its energy mix?

In recent years, Malta has transformed its energy mix used for electricity generation from one based on heavy fuel oil and gasoil to a more sustainable combination of natural gas, electricity imports via the Malta-Italy subsea connection, and increased use of renewable energy sources.

What is Ewa's vision for Malta's power sector?

EWA's vision for Malta's power sector foresees sustained growth of generation from renewable sources, powered by indigenous onshore solar PV installations, large-scale offshore renewable technologies, such as floating wind and solar, and green energy imported over interconnections with neighbouring countries.

Can I apply for a property grant in Malta?

The applicant is not entitled to receive a grant if the property is used principally for business purposes, including the letting of the property on a commercial basis (even if the tenants' use of the property will be residential); technology from any other schemes that include national or public funds such as Government of Malta funds.

Should eco-friendly energy solutions cost you more money?

Using eco-friendly energy solutions should not cost you more money. The Energy & Water Agency, together with the Government, wants to support Malta's households and businesses to make the shift towards living and working in a greener and more sustainable way.

Could bio-methane be a key factor in Malta's future power sector?

Hydrogen technology and bio-methane could also play an important part in Malta's future power sector depending on international developments of these two clean fuels.

Our goal is to increase Malta's share of renewable energy sources and decrease the overall energy intensity of its economy through a range of initiatives that focus on utilising indigenous sustainable energy resources across specific locations.
