

What are Treston ESD storage systems?

Treston ESD storage systems are modular, innovative and easy to use. The product range includes storage units, ESD shelves, cabinets, bins, drawers and perforated panels. An ESD Protected Area (EPA) is a defined space within which all surfaces, objects, people and ESD Sensitive Devices (ESDs) are kept at the same electrical potential.

What is an ESD-protected spacemiser?

Thousands of sensitive components and other parts can be kept in proper order using an ESD-protected spacemiser. The assembly holds 12 small part storage cabinets (551/ 554 ESD) which need to order separately. Owing to its robust base and divider shelf system, the spacemiser retains its cabinets firmly in place.

What are ESD storage solutions?

Innovative ESD storage solutions feature user-oriented design and are made of quality materials that work in any space. Ergonomic, light-to-move ESD carts make it easy to transport goods and tools around while improving productivity at work.

How a modular anti-static ESD storage system works?

A modular anti-static ESD storage solution with user-oriented design and quality materials will work well in any space. With the right kind of a storage system, it's quick and easy to use the stored components, products and tools. Proper storage also keeps tools in good condition and extends their useful life.

What are modular ESD workbenches?

Modular ESD workbenches are suitable for work involving electrical components and other industrial applications. Innovative ESD storage solutions feature user-oriented design and are made of quality materials that work in any space.

What is an ESD protected area (EPA)?

An ESD Protected Area (EPA) is a defined space within which all surfaces, objects, people and ESD Sensitive Devices (ESDs) are kept at the same electrical potential. An EPA can be organised with Treston storage products. A modular anti-static ESD storage solution with user-oriented design and quality materials will work well in any space.

ESD cabinets are storage cabinets specifically designed to safely store sensitive electrical components, such as PCBs (printed circuit boards), that are prone to damage from ESD (electrostatic discharge) - the flow of electricity between two objects..
