

# Feng Shui of installing photovoltaic panels in the factory

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

Why should manufacturing and engineering businesses install solar PV panels?

Through installing solar PV panels manufacturing and engineering businesses are able to considerably cut their overheads, improve business operations and increase their bottom line with up to 100% savings on their daytime electricity costs.

Are factory buildings a good case for commercial solar energy?

Factory buildings are an excellent case for commercial solar energy because of their roof type and size. Most big commercial structures have roofs with sufficient space, making factories and industrial plants contextually ideal for solar panel installation.

How to choose a commercial solar power plant?

The commercial solar power plant's performance ratio should be greater than 80%. Before purchasing a solar panel system, make sure to verify this ratio. 6. Monitoring System Your commercial solar panel system's plant should use cloud-based monitoring. 7. Payback Period

How much can I save by installing solar panels on my roof?

How much can I save on energy costs by installing solar panels on my factory roof? Customers can see a healthy reduction in their bills of up to 80% annually, dependant on the size of the system installed. What is the typical return on investment (ROI) for solar panel installations in industrial buildings?

Are solar panels a good investment for the manufacturing sector?

Generally speaking, the higher the user of energy - the higher the savings and therefore the larger the benefits sought - making the manufacturing sector the perfect case for solar panels and renewable energy technologies.
