

Does Gabon have a green economy?

Greening growth: As Gabon looks to diversify its economy, green growth presents an opportunity to achieve that goal.

Why is Gabon launching a green growth model?

Through the launch of its sovereign carbon credits, Gabon is pioneering a green growth model that connects carbon markets to nature-based solutions that deliver for both people and planet. The new model puts people at the heart of decarbonised green growth and forges a path forward that other African and rainforest nations can embrace.

How can Gabon improve trade?

To increase efficiency and transparency of commercial activities and improve passage of goods, Gabon should take steps to further digitize customs services, simplify import and export documentation, and rationalize the number of checkpoints while improving the capacity and efficiency of relevant government agencies.

Does Gabon have a strong agricultural potential?

Gabon has strong agricultural potential, but the country remains heavily dependent on food imports. While the Government is supporting smallholder farming, the Gabonese Initiative for Achieving Agricultural Outcomes with Engaged Citizenry (GRAINE) has had mixed results.

Are Gabon's carbon credits a green superpower?

As an emergent nature-positive, carbon-negative green superpower, Gabon's carbon credits can help shape a new path. Following the first tranche of 90 million carbon credits (the largest issuance ever), Gabon's forests will continue to generate 50 million carbon credits annually with each credit supporting green and sustainable development.

What can Gabon do for a living?

"Gabon could capitalize on basic investments made in recent years and leverage the comparative advantage it has in sectors such as agriculture, fisheries, digital services, and forestry.
