How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 11.89 kW solar panel system to cover their electricity needs, which comes out to \$31,693 before incentives. Prices range from \$26,939 to \$36,447, but after the federal tax credit, that drops by 30%.

Who are the best solar companies in Georgia?

Among the shining stars in Georgia's solar landscape, Tesla and Palmetto Solar emerged as some of the best solar companies, promising to illuminate the path toward a greener, more sustainable home. The best solar companies in Georgia are Tesla and Palmetto Solar based on our research of customer satisfaction and service quality.

How much does a 6 kW solar system cost in Georgia?

A 6 kW solar system will cost about \$13,980 in Georgia before incentives. After the 30% federal solar tax credit, this drops to \$9,786, or about \$1.63 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.

Is Georgia a solar-friendly state?

Georgia is one of the solar-friendliest states in the nation, with an average of 218 sunny days each year. This ample access to sunlight allows Georgia to make the most of solar energy production throughout the state. Georgia currently ranks 9th in the U.S. for solar energy production.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How do I choose a solar company in Georgia?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Georgia, a solar installer must be associated with a licensed electrical contractor.
