

What services does Deon energy provide?

We provide automated services to regularly update you on the effectiveness and production of your installation. Deon Energy offers innovative renewable energy solutions including photovoltaic PV systems, energy storage, hybrid systems, net-metering, and retrofit-repowering projects.

How has Ghana established its energy sector?

The results show that the Ghana Government has established its energy sector based on the definition of the key targets in line with the world trend. Ghana is equipped with a vast quantity of renewable energy potentials which include hydropower, solar, wind, and bioenergy.

How will Ghana improve its electricity sector from 2010 to 2030?

A stronger foundation has been therefore set for further advancement in Ghana's electricity sector from 2010 up to the moment. The aim of the government is to increase the capacity of renewable energy continuously in electricity generation with 10% of the renewable energy in the country's energy mix by 2030 being a target.

How can Ghana reduce reliance on petroleum fuel?

Ghana has ability to lower the reliance on petroleum fuel through production of its own energy from sources that are renewable. If the right measures are properly taken, the potential renewable resources available in Ghana such as hydropower, solar, wind, biomass, biogas could reduce the current energy demand in Ghana by at least 55%.

What is the solar energy potential of Ghana?

Ghana's geographical position is within the tropic with a solar radiation range from 4.0 to 6.5 kWh/m<sup>2</sup>/day, with an annual period of sunlight from 1800 to 3000 h. Highest solar radiation is received at the northern part of the country. The potential of solar energy is approximated to be almost 35 EJ (Exajoules).

What are the main sources of energy in Ghana?

Biomass or charcoal, crude oil (which include product of petroleum) and electricity are the major sources of energy that are heavily relied upon in Ghana to supply the total energy requirements for the population as well as the industry. Ghanaians traditionally rely on biomass, specifically wood fuel and charcoal.

Ghana's power supply sources are from hydroelectricity, thermal fueled by crude oil, natural gas and diesel, solar and also imports from La Cote D'Ivoire. Ghana also exports power to Togo, Benin and Burkina Faso. Ongoing grid ...

Deon Recreational Centre is the ultimate leisure destination in Ghana serving the widest variety of fun, adventure, relaxation and recreational activities to individuals and groups. DRC proudly offers a range of outdoor activities such as go ...
