

# Global ess supplier Israel

What is the ESS agreement in Israel?

The contract is the largest ESS agreement signed to date in Israel, bolstering the country's energy transition and marking a massive scale-up in installations for the newly launched system. Last year the Israeli government introduced its goal of generating 30% of its electricity needs via renewables by 2030.

Which countries does GE Energy operate in?

The company operates in Israel, Europe and the United States, with a diversified portfolio of operating projects and projects under construction and pre-construction, with a total generation capacity of 2.2 GWDC and total energy storage capacity of 0.5 GWh.

What can ESS do for You?

Combining with the solar system, the highly integrated ESS can be widely used in multiple applications, including energy shifting, ancillary service, like ramp rate control, reactive power provision and more.

Businesses providing ESS to consumers should assess their global VAT/GST obligations at the earliest opportunity in order to avoid incurring any penalties and interest arising from non-compliance. ... Using the OSS enables suppliers to meet their EU wide VAT obligations by filing a single VAT return and making one VAT payment.
