

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

Who owns the electricity in Grenada?

Utility investors: 50% with U.S.-based WRB Enterprises; the public holds 25%; and the government, its employees, and the National Insurance Scheme Grenada hold the remaining 25%. Nearly 99% of electricity is sourced from diesel fuel. The utility maintains an installed capacity of 48.6 MW spread across the three islands.

Does Grenada have solar power?

Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day. A 2- to 4-MW PV installation is planned, but no utility-scale solar plants are currently in operation.

How much does electricity cost in Grenada?

The 2015 electricity rates in Grenada are \$0.34 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh. Like many island nations, Grenada is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

What is the potential of geothermal power in Grenada?

Geothermal studies reveal a potential of approximately 50 MW of baseload power; two 20-MW geothermal projects have similarly stalled in development. Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day.
