GUAM | Generation Renewable provides state of art technology for sustainable energy independence now and all future generations. Solar Energy, Renewable Energy, Sustainable Energy - Residential, Commercial, Local & Federal Government and Military

Discover Solar Spot Guam, where we empower you with the ownership of top-quality solar systems. Learn about our tailored financing, expert installations, and commitment to sustainability. Join us in leading Guam towards a brighter, eco-friendly future.

Insular Affairs (OIA) and the Guam Energy Office (GEO) for providing funding for this effort. In particular, NREL would like to thank OIA Assistant Secretary Eileen Sobeck and GEO Administrator Peter Calvo for their vision and leadership in moving this strategic energy document and planning process forward in the Pacific Territories.

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

We offer home solar and battery storage across Guam protected by our leading 25-year warranty. Learn more about GU home solar panels, incentives, cost, tax credits, rebates, frequently asked questions, and savings.

Discover reliable solar solutions with Solar Spot Guam. We specialize in solar panel installation and renewable energy systems, serving Guam with sustainable energy options tailored to your needs. Explore our services and take the first step towards energy independence today.

The solar array is made up of Solar World solar panels, which is our preferred solar panel manufacturer from the USA. The mounting has been developed by Pacific Solar & Photovoltaics and is structurally engineered to withstand typhoon winds up to 170mph sustained winds, which meets Guam's building code requirements.

A valuation of distributed solar was performed for the island of Guam using solar PV performance data ... cost, and planning data from Guam Power Authority (GPA). Solar production, represented by the composite output of the nine systems, scaled as a 1 kW-AC resource, was shown to be generally uncorrelated with the GPA system peak. This ...
