Who is Guascor energy?

Guascor Energy is a global leading manufacturer & services provider of gas and diesel engines designed for power generation, cogeneration, waste conversion and marine use. For more than 50 years, the company has been supporting customers in the process of decarbonisation and decentralization of energy & power.

What is a Guascor energy gas engine?

This means lower costs for you and more sustainable emissions for the environment. Guascor Energy gas engines are designed to operate on a wide variety of fuels including natural gas, renewable biogas, propane, synthetic gas, and mixed gases.

Are Guascor energy engines reliable?

The excellent quality, efficiency and reliability of Guascor Energy engines have been verified in marine and industrial applications for more than 50 years and more than 3.000 actively running engines & gen-sets worldwide by the end of 2022.

Can Guascor energy engines run with pyrolysis gas?

Due to the great fuel flexibility, Guascor Energy Engines are available for running with different gases such as syngas, pyrolysis gas or gas produced by biomethanization processes.

Are Guascor energy spare parts good quality?

Guascor Energy spare parts comply with the highest quality standards, being designed, manufactured and tested with the same rigorousness as our engines.

Why should you choose Guascor energy?

Guascor Energy provides a wide variety of effective solutions to produce energy where it is most needed and difficult to obtain by meeting the demanding requirements of end-users with quality, reliability and efficiency. Gas engines power electricity production plants when needed.

At Guascor Energy we support our customers end-to-end: from the identification of requirements for their projects, all the way through to the maintenance and servicing of their equipment. In addition to our broad stock of original spare parts, we count with a team of highly specialized and qualified experts that are able to provide technical ...

Since its foundation in 1966, Guascor Energy has become a global manufacturer of gas and diesel engines designed for power generation, cogeneration, waste conversion and marine use meeting strictest environmental regulations. The excellent quality, efficiency and reliability of Guascor Energy engines have been verified in marine and industrial ...
