

5 ???· Typically, one circuit is intended to power the air conditioning systems, and the other powers the remainder of the loads. Because our air conditioning systems can operate on 50 or 60Hz power, we decided to install a simple 50Hz/60Hz isolation transformer on one of the shore power circuits. We installed an ASEA Power Systems 12kVa power ...

At ASEA Power Systems, our engineering department collaborates closely with builders to create ideal shore power conversion solutions. Actively engaged during the product development process, we ensure our products align with the latest industry standards and technologies.

ASEA Power Systems" authorized service partners are within easy reach of most OEM shipyards, ensuring successful installation, commissioning, and startup. Our global presence and commitment to excellence have also been recognized at IBEX with the International Boating Magazine Export Excellence Award for outstanding international partnerships ...

5 ???· Other devices will work but may run slower or use more current on 50Hz power. A major factor in preparing your boat's electrical system for international power is handling this frequency difference. **GETTING THE VOLTAGE RIGHT.** The second factor to consider in preparing to connect to international power is line voltage.

As an authorized dealer, we offer top-quality ASEA Power Systems, designed for seamless power management in marine environments. Ideal for yachts, commercial vessels, and docked boats, ASEA ensures consistent, clean power and efficient energy conversion from multiple sources. **Key Features:** Precise Voltage Regulation: M

ASEA Power Systems stands at the forefront of the marine industry, renowned worldwide for its cutting-edge power conversion equipment tailored exclusively for marine applications. Our product lineup spans a power range of 8-1000+ kVA for converters.

ASEA Power Systems is a world leader in the design and fabrication of power conversion equipment specially designed for the marine market. Manufacturing innovative isolation transformers, shore power converters and power management systems, ASEA Power Systems offer a broad range of technologically advanced and fully customizable power equipment ...

Quality Power for your most Sophisticated On-Board Electrical Equipment ASEA Power Systems" shore power converters provide precision regulation (<1%) and low harmonic distortion (<1%) to the yacht's power distribution grid. No longer will power spikes, sags and surges present on most docks affect the yacht.

With fully-shielded isolation transformers, ASEA Power Systems is a world leader in the design and fabrication of power conversion equipment specially designed for the marine market. Their products range in power from 8 - 1000+ kVA and ...

ASEA's Isolation Transformer is a drop-in replacement for Charles IsoG2 designed to protect vessel under-fittings from galvanic corrosion and to shield on-board electronics from reverse polarity and shore power fluctuations. It also ensures safety by preventing the boat from sending unintended electric currents into the surrounding water.

With fully-shielded isolation transformers, ASEA Power Systems is a world leader in the design and fabrication of power conversion equipment specially designed for the marine market. Their products range in power from 8 - 1000+ kVA and come in both air and liquid cooled variations.

Reliability is at the heart of ASEA Power Systems. We pride ourselves on delivering unparalleled reliability, ensuring that our customers have a seamless and secure connection to shore power no matter where their journey takes them. Our products are trusted by yacht owners, marinas, and shipyards worldwide.

ASEA Power's extensive network of trusted service partners are strategically located at major ports worldwide to provide maintenance and emergency repairs whenever you need it. With 26 years of experience, we stand at the forefront of marine innovation and quality, supported by the largest network of authorized service providers in 127 countries.

At ASEA Power Systems, we collaborate with builders, refit yards, yacht management companies, naval architects, marine engineers, and captains to create the ideal shore power conversion solutions. ASEA shore power solutions are synonymous with quality, and reliability, supported by a network of authorized service providers in 127 countries. ...
