What does the Guyana Energy Agency do?

The Guyana Energy Agency continues to support national efforts in transforming the country's sustainable low-carbon pathway and the energy sector, as it contributes to providing cleaner, affordable energy access for all, as well as promoting energy efficiency and conservation practices.

Where is Guyana's second mega-scale solar farm located?

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage.

What did the GEA do for Guyana?

These advancements not only addressed rising electricity demand, but also expanded renewable-energy access across local communities. The GEA supported the implementation of a massive electrification project to supply, deliver, and distribute 30,000 solar home energy systems to hinterland and riverine communities in Guyana.

How many solar homes are distributed in Guyana?

The GEA supported the implementation of a massive electrification project to supply, deliver, and distribute 30,000 solar home energy systems to hinterland and riverine communities in Guyana. A total of 26,398 units were distributed as of December 2023.

How many EV charging stations are there in Guyana?

Six electric vehicle (EV) charging stations were installed for public use in Regions Three, Four and Six. This project marks the first publicly accessible charging infrastructure along Guyana's coast. (Office of the Prime Minister photo)
