The plant will therefore generate non-intermittent renewable electricity in the North-West region of French Guiana, which faces an important increase in electricity demand on a geographically constrained territory.

Cultural Melting Pot. French Guiana's history and culture are deeply influenced by a mix of indigenous peoples, African descendants, and European settlers. This blend has created a rich cultural tapestry that is evident in the region's traditions, cuisine, and festivals.. The population is a vibrant mix of ethnic groups, including Creole, Maroons, Amerindians, ...

Heliostorage receives financial support from Nefco to expand its emission-free heating and energy storage solution across Europe. Within the EU, heating and cooling operations make up 50% of the total energy consumption while only 23% is being generated from renewable sources. "The energy crisis Europe experienced last year and the continued ...

Our 70 kWh all-in-one battery solution is equipped with our smart control software designed to seamlessly integrate with the spot market. This enables businesses to not only contribute to grid stability by storing excess renewable energy or drawing from the grid during low-demand periods but also to capitalize on fluctuating energy prices for maximum cost savings.
