What is Holcomb energy systems?

Holcomb Energy Systems is setting a new industry standard in electric power generation. Our core technology, the Holcomb Energy System (HES), is an entirely new source of energy -- using no fuel and putting out zero emissions, it is scalable, silent, and point of use.

Where can the Holcomb energy system be deployed?

The Holcomb Energy System can be deployed in areas where no electrical grid infrastructure exists. One in five people worldwide are living with no electricity and millions more have just intermittent access. We can make rural electrification accessible, affordable and 100% clean.

Where does the energy to run the Holcomb energy system come from?

Where does the energy to run the HES come from? The Holcomb Energy System has no onboard fuel source - its power source is the material from which it is constructed - electrical steel, and our unique, proprietary method of harnessing the energy of the electron spin in the atoms which comprise the electrical steel to produce usable electric power.

Who is Astra-Holcomb energy systems?
