

# How much does wind power usually cost

How much does a wind turbine cost?

Prices vary from around £7,000 for a 1.5 kW freestanding wind turbine to around £70,000 for a 15 kW one. Buying and installing a commercial wind turbine could cost anywhere from £345,000 for a 100 kW turbine, to £3.13 million for a 3.5 MW turbine. Usually, the bigger the turbine, the less you pay per kW.

How much does a roof-mounted wind turbine cost?

A roof-mounted turbine could be a good option if you have a high roof that regularly gets enough wind speed. The average cost of a roof-mounted domestic wind turbine is £2,000. These turbines are generally cheaper and easier to install than freestanding wind turbines. However, they're typically small, varying in power from around 0.5 to 2.5 kW.

How much does a freestanding wind turbine cost?

Freestanding wind turbines are more expensive to install, but they're much more effective if you're serious about going fully renewable or perhaps even benefitting from the Feed-in Tariff. Prices vary from around £7,000 for a 1.5 kW freestanding wind turbine to around £70,000 for a 15 kW one.

How much does a 5kW wind turbine cost?

On average, a free-standing 5kW wind turbine may cost between £20,000 and £25,000. But don't forget that you'll also have to cover the costs of planning permission, preparing the site, and connecting your turbine to the electricity grid. This could bring the total to £30,000-£40,000.

How much do offshore wind turbines cost?

Offshore wind turbines are, understandably, more expensive per MW installed. The initial outlay can reach as much as £5 million per MW installed! The Feed-in Tariff scheme closed to new applications on 31 March 2019. The information below is for reference only.

Are large wind turbines worth it?

As you can see, large wind turbines cost significantly more to run than smaller turbines. But as larger wind farms will have a heftier budget and more scope for returns, the maintenance investment is usually well worth it. It's also key to note that these costs wouldn't typically fall on a landowner unless they were self-developing a project.

**Commercial Wind Turbines.** The cost for a commercial wind turbine in the UK ranges from £1.3 million to £2 million per MW installed, not including acquisition of the land. These costs include installation, connection ...
