

How to deal with scratches on photovoltaic panel glass

Why do solar panels get scratched?

Even the smallest debris, like twigs, leaves, or dirt, can cause small micro-scratches on your solar panels. The scratches from fallen debris can dramatically lower your panels' energy output. The scratches can hinder sunlight from shining directly onto the cells, and that decreases the amount of solar energy each panel is able to absorb.

How to repair a broken solar panel?

Watch out for broken glass: Broken solar panels may have shattered glass, so be cautious and avoid direct contact. After ensuring safety, assess the damage. If it's minor, like a small crack, you can try repairing it using transparent laminating film. However, significant damage may require professional help for repair or replacement.

Can a scratch affect a PV panel's durability?

It just isn't acceptable. I really do not agree that the scratches can in any way affect the panel's durability. All MCS accredited panels are encapsulated in very thick glass and a scratch isn't going to make water go anywhere near the PV cells. I would suggest you ask for a replacement.

How do I know if my solar panels need repair?

Now that you're aware of the potential dangers, protecting your solar investment should be a breeze. Start by conducting a visual inspection of your solar panels. Check for cracks, broken glass, or any debris on the surface. If you spot visible damage, it's a sign that your solar panels may need repair or replacement.

Can a solar panel be repaired?

Cracked glass: Cracks in the glass of your solar panel can usually be repaired with a special UV-resistant sealant. Damaged wiring: If the wiring on your solar panel is damaged, you may be able to repair it yourself with some electrical tape. More extensive damage, such as large cracks or holes, will usually require the help of a professional.

Can a scratch on a PV panel cause water damage?

All MCS accredited panels are encapsulated in very thick glass and a scratch isn't going to make water go anywhere near the PV cells. I would suggest you ask for a replacement. If the modules were already scratched when the installer received them, the module warranty should cover that.

In situations where the glass surface of the solar panel is shattered, replacing the glass may be necessary. ...
