

Ip68 waterproof test energy storage cabinet

What is an IP68 waterproof enclosure?

Today, we'll focus on the highest standard IP rating: the IP68 waterproof enclosure rating. Source: lenapolll/Shutterstock The IP rating system is an international standard for rating the ingress protection of electrical enclosures. When we say ingress protection, we mean how well the enclosure keeps things like dirt and water from getting inside.

What is the IP68 waterproof rating?

The IP68 waterproof rating identifies outdoor electrical enclosures with the highest level of waterproof performance. Find out more inside.

What is IP68 testing?

Contact us or call (724) 657-9940 and we will determine the best course of action. Part of the International Protection (IP) Marking system, governed by the International Electrotechnical Commission (IEC), IP68 testing provides guidelines for the level of protection offered by enclosures against dust and water.

What is an IP68 rating?

IP68 ratings occupy the very top of the IP rating scale. Both the first digit and second digits are at their maximum level: A 6 for total protection against solid ingress. An 8 for total protection against water ingress, up to and including complete submersion below one meter and for more than 30 minutes.

What is IP56 rated protection?

Available as ventilated models or with IP56 rated protection to ensure protection against harmful dust and strong water jets. Find out more about International Protection levels in this helpful IP ratings guide.

Do you need an IP68 enclosure?

Sometimes you need the best of the best protection for your electrical devices. In challenging conditions with critical assets on the line, it pays to reach for the highest standard of dust and water resistance you can find. When it comes to electrical enclosures, an IP68 enclosure is that standard.
