Are solar panels a good investment in Ireland?

Solar panels in Ireland are a good investment and a typical solar PV system usually pays for itself in around 5-6 years. After that, it's free electricity all the way. The initial outlay for a solar PV system is roughly EUR7,000 to EUR10,000. Most of our customers generate more solar electricity than the average Irish household consumes each year.

How to choose a solar panel system in Ireland?

In Ireland, the panels should face south to get the most direct sunlight. The tilt angle should also be considered to ensure maximum efficiency. The size of the solar panel system should be based on the energy needs of the household. It is important to consider the electricity bill and energy consumption to determine the appropriate system size.

What is solar energy & why is it so popular in Ireland?

Solar energy is a clean, renewable source of energy that is becoming increasingly popular in Ireland. With the cost of electricity bills on the rise, many households are turning to solar panels as a way to generate their own electricity and reduce their carbon footprint.

Do solar panels work in Ireland?

Short answer: yes, solar panels in Ireland work very well. Most of the solar PV systems that we install generate more electricity than the average Irish home consumes. Here's what that looks like in practice. What is the forecast annual power output for our past customers?
