

Is it illegal for companies to generate their own solar energy

Can a business generate its own electricity?

There are a few different ways that your business can generate its own electricity. But not all systems will be suitable for everyone, hydropower, for example, is only suitable for businesses located near running water. Here is a rundown of the options to consider:

Can solar energy provide a home with all the power?

In theory, solar energy should be able to provide your home with all the power it needs for the entire year, however, solar has a few limitations you should be aware of. Firstly, the solar panels should have maximum exposure to the sun year round, otherwise they'll struggle to generate adequate amounts of energy.

Can I use my solar panels if I'm not at home?

Additionally, even though your solar panels will generate electricity, it is unlikely to all be used by yourself. The sun is obviously only out during the day, so if you are not at home, it will be fed into the grid so that it can be used by somebody else.

Are solar PV installations sold between companies?

However, we are aware that in some instances solar PV installations are sold between companies, especially when companies go out of business. This change in ownership may not be communicated to the homeowner.

Can I install renewables in my home and generate my own electricity?

If you are interested in installing renewables in your home and generating your own electricity, you may be surprised to learn that there is financial support available from the UK government. Formally, a domestic grant was available called the Renewable Heat Incentive (RHI) but this closed to new applications on the 31st March 2022.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.
