

What is isitepower-m power system?

The iSitePower-M system consists of power modules and battery modules. It can store and release electricity based on the status of PV modules, mains, and gensets. The power system is running properly. The power system is not running. The power system is faulty. The power system has no input current.

Does isitepower-m need a leakage protection device?

No leakage protection device is required for the AC input of the iSitePower-M. If a leakage protection device is configured, it is recommended that the leakage current be greater than or equal to  $100 \text{ mA} \times n$ , where  $n$  is the number of power modules. The live (L) wire and neutral (N) wire of an AC power cable must be correctly connected.

Do I need a circuit breaker for isitepower-m?

Page 17 AC switches (with a capacity of 40 A) must be installed for phases L and N of the iSitePower-M AC input. The AC switches are delivered with the iSitePower-M. Do not use a Type D circuit breaker because it cannot effectively protect products. Page 18 Installing PV Input Power Cables 1.
