

It is good to install solar photovoltaic panels on the roof

Should I install solar panels on my roof?

If your roof faces another direction as you can likely still see plenty of benefit from installing a solar array. East and west facing roofs are also suitable for solar panels and will still see a good deal of energy generation throughout the course of the day.

Can solar panels be installed on a roof that faces north?

Solar PV panels are not recommended for a roof that faces north. You also need to consider both the age of your roof and how strong it is, as PV panels are heavy. Shade could be a big problem for solar panels, so no panels should be installed where there is shade from trees, chimneys, walls or other obstructions.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Are solar panels worth it if you have a south-facing roof?

Solar PV panels are worth considering if you have a mainly south-facing roof with little or no shade and you're not thinking of moving home in the near future. How much energy you could produce with solar panels - and therefore how much money you could make or save - will depend on:

Can solar panels work on a flat roof?

Yes, solar panels can work just as well on a flat roof as on a pitched roof, provided they are correctly angled to capture the maximum amount of sunlight. A good racking system can tilt the panels to the optimal angle, ensuring they receive sufficient sunlight throughout the day, which maximises their efficiency.

Should you install solar tiles on your roof?

"If you are removing or replacing the tiles you may choose to use solar tiles," says David. "The solar cells are built into the tiles or slates and mounted on the roof as if they were normal tiles or slates. Although not completely invisible these solar solutions can be much better aesthetically than the larger panels.
