For those seeking an electric driving experience, the Panamera Turbo E-Hybrid boasts a more powerful electric motor, increased charging power (11 kW), and a larger high-voltage battery (25.9 kWh). It races to 100km/h in a staggering 3.2 seconds and achieves a top speed of 315km/h.

As early as 2016, we began to understand the power of bi-directional DC-DC charging and the impact it could have on overcoming the steep de-carbonisation challenge. Our 40 plus years developing world-leading power systems for the rail and aerospace industries armed us with the technology to enable it. But it went way beyond creating rapid chargers.

Technologies With over 40 years experience in Power Electronics and High-Speed Electrical Machine design, development, test and manufacture, we remain at the very forefront of the clean technology industry, having delivered over 25,000 systems ...

Turbo Power Systems (TPS) | 5,612 followers on LinkedIn. Powering Intelligent Solutions | Established in 1986, Turbo Power Systems (TPS) is a leading designer and manufacturer of power conversion technologies supplying customers in the transport, energy and industrial sectors.
