

1. Energy Storage Systems Handbook for Energy Storage Systems 3 1.2 Types of ESS Technologies 1.3 Characteristics of ESS ESS technologies can be classified into five categories based on the form in which energy is stored. ESS is defined by two key characteristics - power capacity in Watt and storage capacity in Watt-hour.

Chapters include the practicalities of energy storage, generation, and absorption of electrical power; the difficulties of intermittent generation; and the use of pumped and underground pumped hydroelectric energy storage. The book highlights the storage of compressed air, battery energy, solar thermal, and natural gas sources of energy.
