Will Lesotho be able to pilot a hybrid solar PV mini-grid?

Successful pilot hybrid solar PV mini-grid in Lesotho paves way for a further 10 mini-grids that will provide first-time energy access to 30,000 people and clean power to seven health clinics.

Does Lesotho have electricity?

Known as the kingdom in the sky, Lesotho is a small, developing country crossed by mountain ranges and rivers, making it difficult to get electricity to rural regions. Recent estimates suggest that less than half of all households have electricity.

Can solar power be stored in a battery?

Existing solar systems typically have solar inverters which change the DC power produced by panels to AC power that can be consumed in your home or exported onto the grid. But if you want to store that AC power in a battery, it needs to be inverted again to DC power.

Is Lesotho launching a solar mini-grid project?

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

Why did OnePower move to Lesotho?

The move coincided with OnePower's successful bid to develop the first utility-scale solar project in Lesotho, a 20-megawatt project that will sell electricity to Lesotho's central grid in addition to OnePower's minigrid work. OnePower expects that project, named Neo 1, to start delivering power to Lesotho's central electric grid next year.
