

Lesotho Energy Policy 2015-2025 is a framework policy that sets out the strategic direction of the country's energy sector developments. It is aligned to the Vision 2020 and the NSDP and promotes development of environmentally cleaner renewable energy and increasing its share in the country's energy mix.

The project which aims to increase electricity in rural and peri-urban areas entails three components which are; Grid Extension to Peri-urban areas of Lesotho, Rural Electrification by mini grids and Technical Assistant and Implementation Support.

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings.
