

Lunan Solar Support Factory

What is the lunar system?

The Lunar System is a solar and battery product brilliantly designed to let you capture, store and use every ray of sunshine -- day, night, and even during an outage. Homeowners and installers simply add solar panels to complete the system. Included in the Lunar System are four primary products:

Does Lunar Energy have a rooftop solar system?

Lunar Energy has just raised \$300 million to help launch its fully integrated rooftop solar and battery storage system for homes.

Does lunar energy make solar panels?

Unlike Tesla, Lunar Energy does not make or sell its own solar panels. Instead, Lunar is partnering with Sunrun and other installers to handle not only customers' solar needs but also to install Lunar System as well.

Does Sunrun offer Lunar Energy Solutions?

"I'm excited to see Sunrun, and the industry at large, begin offering Lunar Energy solutions to millions of homes across the nation," says Lynn Jurich, co-CEO of Sunrun. She is also chair of Lunar Energy's board of directors.

Does Lunar Energy have a 'end-to-end home battery system'?

Now he is off on his own and heading a new company called Lunar Energy that promises an "end-to-end home battery system" that eliminates the confusion of dealing with one company for your rooftop solar system, another for your residential storage battery, and possibly a third company to make the two systems play nice with each other.

How does a lunar system work?

Homeowners and installers simply add solar panels to complete the system. Included in the Lunar System are four primary products: Lunar Battery: The most compact and powerful inverter and battery in its class. Lunar Bridge: Connects your home to the grid and acts as your electrical panel to monitor and send power where and when it's needed.
