

What is energy in Luxembourg?

Energy in Luxembourg describes energy and electricity production, consumption and import in Luxembourg. Electricity sector in Luxembourg is the main article of electricity in Luxembourg. Primary energy use in Luxembourg was 48 TWh in 2009, or 98 TWh per million inhabitants.

How much electricity does Luxembourg use?

Electricity sector in Luxembourg is the main article of electricity in Luxembourg. Primary energy use in Luxembourg was 48 TWh in 2009, or 98 TWh per million inhabitants. Luxembourg is a net energy importer; 81.5% of the electricity consumed in the country, for example, was imported from neighboring European countries in 2021.

Is Luxembourg ready for a low-carbon economy?

Luxembourg is targeting a sharp reduction in emissions by 2030, but new measures are needed to boost investment in renewables and energy efficiency, new IEA report says. The International Energy Agency released its latest in-depth review of Luxembourg's energy policies today, welcoming the country's ambitions to shift to a low-carbon economy.

Is Luxembourg ready to achieve its energy goals?

"The IEA is ready to support the government's efforts to achieve these goals, starting with the recommendations contained within this report." The report notes that Luxembourg faces challenges in achieving its energy objectives. The country's energy supply is dominated by fossil fuels, and carbon dioxide emissions are rising since 2016.

Is Luxembourg a net energy importer?

Luxembourg is a net energy importer; 81.5% of the electricity consumed in the country, for example, was imported from neighboring European countries in 2021. There was no decline in the climate change gas emissions (CO₂) from year 2008 to 2012 in Luxembourg. There was no better efficiency in the use of electricity from 2008 to 2012.

What is Luxembourg doing to ensure a secure supply of electricity?

The IEA report notes that Luxembourg is undertaking actions on several fronts to ensure a secure supply of electricity. The country is aiming to increase domestic electricity generation to cover one-third of national demand by 2030, mostly from solar PV and wind.

Luxembourg's integrated national energy and climate plan (PNEC) is an important element of the Grand Duchy's climate and energy policy. It sets out the national climate and energy objectives for 2030, as well as the ...
