

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

Why is Mali a partner of power Africa?

Mali is a partner of Power Africa, a market-driven, U.S. government-led public-private partnership (PPP) aiming to double access to electricity in sub-Saharan Africa. It offers tools and resources to private sector entities to facilitate doing business in sub-Saharan Africa's power sector.

What is the energy strategy of Mali?

The general energy strategy of Mali focuses on the development of local resources such as hydropower and solar energy in order to reduce petroleum imports. Objectives of the National Energy Policy regarding renewable energy are: Promotion of RE.

What is Malian energy policy?

Malian energy policy aims at contributing to a sustainable development of the country by making energy services available to as many as possible, thereby favouring (promotion of) social-economic activities. There are four specific objectives: Strengthen international cooperation regarding the energy sector.

How much energy does Mali use?

The remaining 4% of the primary energy supply is largely made up of renewably generated electricity, mainly by hydropower. On the energy consumption side, households consume 86 % of Mali's energy, (road) transport 10 %, industry (mainly mining) 3 % and agriculture 1 % (2003 figures). [?Go to Top](#)

Will Mali achieve universal access to electricity by 2030?

For clean cooking, Mali targets universal access by 2030. In recent years, the rate of access to electricity in Mali has surpassed 25%, thanks to a public focus on mini-grid solutions. The government of Mali now plans to increase hybridisation of its mini-grids by adding PV capacity to diesel power plants.
