Understand why it happens and learn effective solutions to silence your device. If Rollo keeps beeping, it is most likely due to its power source. ... If Rollo keeps beeping, it is most likely due to its power source. Please ensure you are using Rollo's power adapter and that all connections are secure. Please try plugging it directly into wall ...

The business will now be known as Rollo Power Solutions, a trading division of Finning (UK) Ltd., and will be managed as part of Finning's Power Systems business. As part of the deal, Finning acquired new branch locations in Grimsby, Bristol and Chatham, which will join its national network of 24 branches in the U.K. and Ireland.

This cable is used for the distribution of the power and the SCS operating signals to all system devices. This cable is used in the MyHome system but also in the SCS & BACnet hotel Guest Room Management System. The cable consists of a grey external sheathing and two twisted flexible conductors with a section of 0.35 mm², one blue and one white.

Please ensure you turn off Rollo using the power switch on the back of the printer before connecting or disconnecting the power cable. Connecting the power cable while switch is in ON position can produce a spark. Should there continue to be spark, please check the ground connection of your power outlet or try a different outlet.

Operating since 1933, Rollo has a long, established and successful heritage in the power generation and plant industries. Our roots can be traced back to a company first known as TS Engineering and subsequently, TS Rollo, providing nationwide maintenance and repairs for marine and power generation customers.
