

This major new initiative will increase the total power of the facilities owned by M.E.R. to 128 MWp (106 MW of photovoltaic power and 22 MW of wind power), together generating 184 GWh per year, or 34% of the ...

This major new initiative will increase the total power of the facilities owned by M.E.R. to 128 MWp (106 MW of photovoltaic power and 22 MW of wind power), together generating 184 GWh per ...

During a press conference held late in the morning on Thursday 29 June, Marie-Pierre Gramaglia, Minister of Public Works, the Environment and Urban Development, presented two aspects of Monaco's investment in solar power: a solar resource map for the Principality and the launch of a joint venture by the Prince's Government and SMEG to ...

In line with this objective, Monaco Energies Renouvelables has just acquired eight photovoltaic parks, with a total production capacity of 39 MWpeak, located in seven Departments in the south of France.

A giant solar power station has been inaugurated on the roof of Monaco's Grimaldi Forum, marking a significant milestone in the Principality's energy transition. Eventually, electricity generated from the station will be used to power the new eco-district.

In Monaco, it is possible to capture the energy of the sun in two ways: using photovoltaic panels, which transform sunlight into electricity, and with thermal panels, which use the energy produced by the sun's rays to heat water.

A giant solar power station has been inaugurated on the roof of Monaco's Grimaldi Forum, marking a significant milestone in the Principality's energy transition. Eventually, electricity generated from the station will be ...

This latest operation will increase the overall power of the Monaco Renewable Energy plants to 128 MWpeak, made up of 106 MW photovoltaic and 22 MW wind, together producing 184 GWh per year, equalling 34% of Monaco's energy consumption.

In Monaco, it is possible to capture the energy of the sun in two ways: using photovoltaic panels, which transform sunlight into electricity, and with thermal panels, which use the energy ...

This major new initiative will increase the total power of the facilities owned by M.E.R. to 128 MWp (106 MW of photovoltaic power and 22 MW of wind power), together generating 184 GWh per year, or 34% of the Principality's electricity consumption.

This website is an interactive map that allows users to easily identify every roof in Monaco, its potential solar resource, the exploitable area on which photovoltaic panels could be installed, and the possible annual electricity production. This means that residents can find out the solar capacity of their building.

This is the next step in the partnership between Monte Carlo Bay and SMEG. The palace chose to cover part of its roof with a photovoltaic generator whose panels were custom designed. Due ...

Monaco has joined forces with France to establish a large solar park, representing a significant advancement towards its sustainable energy ambitions. Situated in France, this photovoltaic park will harness solar energy to produce clean electricity for Monaco, decreasing its dependency on fossil fuels and lowering its carbon emissions

Monaco has joined forces with France to establish a large solar park, representing a significant advancement towards its sustainable energy ambitions. Situated in France, this photovoltaic park will harness solar energy ...

This is the next step in the partnership between Monte Carlo Bay and SMEG. The palace chose to cover part of its roof with a photovoltaic generator whose panels were custom designed. Due to its surface and its equipment, this solar structure is the most efficient of Monaco .
