

New Zealand panel solar 605w

This state-of-the-art 605W solar panel system combines innovative double glass technology with exceptional efficiency to deliver maximum performance and long-lasting durability. As a clean energy enthusiast or a savvy investor looking for a top-quality solar solution, Renesola's bifacial solar panels are the perfect choice for you.

Based on the 210mm large-size silicon wafer and monocrystalline PERC cell, the Vertex comes with several innovative design features allowing high power output of more than 605W. Excellent temperature coefficient and low irradiation performance brings the greater power.

This solar panels is adaptable to a variety of application scenarios including utility-scale power stations, C& I and distributed rooftop projects, agri-PV solar farms, and offshore solar plants.

Bifacial solar cell, symmetrical design, low risk of micro-crack; 25 years materials warranty, 30 years power warranty; Bifaciality is up to 80%, up to 30% more energy yield than conventional modules; Higher power output under low irradiance environments like on cloudy or foggy days

Introducing the LONGi 605W Bifacial Solar Panel, engineered to meet the demands of utility power plants with exceptional performance and reliability. With 144 cells and Longi Hi-MO7 technology, this panel achieves high energy yields through advanced HPDC cell technology, ensuring superior efficiency and power output.
