

New Zealand solar companies that rent your roof

Who is NZ solar?

NZ Solar was born of a combined desire to take an environmentally friendly approach to generating power and an appreciation of the growing costs of electricity. We want to help you use sustainable solar power to power your home or business, heat your hot water, charge your electric bikes or EV. Reduce your costs.

What is rooftop solar & how does it work in New Zealand?

Rooftop solar is a clean, low cost energy source available to New Zealand homes. Over the lifetime of a rooftop solar system, the electricity generated costs far less per kWh than electricity from the grid. Another way of looking at it, is that once the system has paid itself off, you've effectively got free electricity from the solar.

Do you need a solar power system on your roof?

Although many large entities are not yet committed to solar power, a household can proactively choose to benefit from having a solar power system on its roof. Most power companies currently pay at 8c/kWh for electricity exported to the grid. You will need to contact your power company to confirm their buyback rate.

How do solar panels work in New Zealand?

They work by harnessing light energy (photons) to produce an electric current. Solar PV panels can be installed on the roof of your home, garage, or even in your yard - wherever they will capture the most sunlight. Solar systems can either be connected to or independent of the New Zealand grid.

Is solar power transforming New Zealand's commercial sector?

The move to solar power in New Zealand's commercial sector is **TAKING OFF!** All over the country businesses and property owners are taking advantage of solar power to enhance their properties, provide long term income and reduce business overheads.
